SUMMARY

I'm a senior Computer Science student with a solid foundation in Linux environments, database programming, web development, and computer networks. Throughout my academic journey, I've also developed leadership skills, working on team projects and taking on roles that have helped me improve my communication, organization, and collaboration. I'm passionate about tackling complex technical challenges and enjoy working in environments that require creative problem-solving and attention to detail

EXPERIENCE

MMCYTech
Addis Ababa, Ethiopia
Software Development Intern
11/2024 - 03/2025
Work Description
- Built scalable web applications with React on the frontend and Strapi CMS on the backend, integrating APIs and managing databases to deliver efficient, high-performance solutions.
- Focused on creating scalable, maintainable systems by optimizing workflows and ensuring long-term performance.
