To Whom It May Concern,

Subject: Request for Support for the Google Developers Group (GDG) on Campus HiLCoE

Dear School Administration,

The Google Developer Group (GDG) on Campus HiLCoE has been actively operating for the past four years, evolving through different leadership teams and continuously expanding its impact. Over the years, GDG has successfully organized numerous workshops, hackathons, developer dialogues, and study sessions, fostering a culture of innovation, collaboration, and technical excellence within the school community.

This year, our chapter is led by a dedicated team of seven highly motivated students from different batches, all committed to building a strong, inclusive, and dynamic tech community. Our mission is to empower students by sharing knowledge, encouraging collaboration, and creating opportunities for growth and innovation.

Through both in-person and online events, we have significantly contributed to the campus by creating spaces for peer-to-peer learning, networking, and hands-on experience with real-world technologies. Our efforts have not only enriched students' technical skills but also enhanced their leadership and teamwork abilities.

As we continue to expand our reach and impact, we have planned a series of engaging events, workshops, and initiatives to further support the growth of our community. However, to achieve these goals effectively, we seek the school's recognition and support in areas such as:

- **Official Recognition**: Formal acknowledgment as a school-affiliated organization.
- **Resource Allocation**: Access to facilities, equipment, and logistics for events.
- **Promotional Support**: Assistance in reaching more students through school communication channels.
- **Faculty Collaboration**: Opportunities to align our initiatives with the school's vision and curriculum.
- **Growth Opportunities**: Support in securing internship offers, industry collaborations, and partnerships that will help our members gain hands-on experience and connect with relevant stakeholders in the tech ecosystem.

With the school's support, we can continue to make a meaningful impact, empower students, and strengthen HiLCoE's reputation as a hub for technological excellence. We look forward to your collaboration and are happy to discuss this further at your convenience.

Sincerely,

Kidus Girma	**Hanna Yohannes**	**Yordanos Dereje**
